International Student Exchange Program

Hong Kong, China

January – May 2014

Research Experience

Michigan State University

- Analyzed data on Michigan State University students to explore the effect of honors college participation on student outcomes. This research will become my job market paper.
- Fielded Qualtrics surveys to undergraduate students. Written up the results of the largest survey as a working paper for my dissertation.
- Studied the effect of test score labeling on post-secondary outcomes using administrative data on Michigan students. This research will become a chapter in my dissertation.

East Lansing, MI

2019 - Present

University of Florida

- Analyzed college graduation rates by college type using data from the College Scorecard.
- Ran multivariate regressions in R.
- Written up as an economics honors thesis

Gainesville, FL

2016

North Park University

- Worked from home with Professor and another undergraduate student to design a research project, collect data, and run regressions in R as part of a summer internship. We looked at how changes in economic freedom are correlated with changes in economic growth across countries.

Gainesville, FL

2016
